
Material:PET

A= width inside

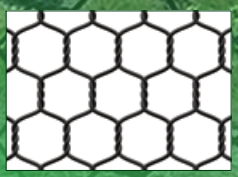
B= width center

C= height inside

D= diagonal inside

T= PET monofilament thickness

Mesh size	T(mm)	A(mm)	B(mm)	C(mm)	D(mm)	Weight	Rolls width(m)
Small Mesh	2.50	35	40	43	37	570g/sq.m	1.60
Small Mesh	3.00	35	40	43	37	850g/sq.m	1.60
Large Mesh	3.00	45	50	71	59	590g/sq.m	2.00
Super large Mesh	3.00	73	80	100	85	360g/sq.m	1.80



(KikkoNet®) Small Mesh-M35

(KikkoNet®) Large Mesh-M45

Six Advantages Long life ≥ 60 years

Durability

Tensile strength is comparable to traditional wire mesh, the service life is more than 60 years.

Weatherability

Strong UV resistance, no deterioration

Corrosion resistance

Immune to salt damage,acid soil and volcanicgases,no rust, no corrosion.

Light weight

1/5 weight of traditional wire mesh,manual handling without heavymachinery is available to shorten the construction time andincrease the safety in escarpment and high place

Easy Construction

The installation can be completed quickly and easilywith cable tie and metal fence parts

Economy of maintenance

Greatly reducing maintenance costs
